# Exchange Activities in the fields of Medicinal Plant Resources (A), Pharmacy (B) and Pharmaceutical industry (C) (19-22 July 2019)

We have also hosted an academic forum at Ritsumeikan University as well as visits to drug store, pharmacy (the biggest in Japan) and pharmaceutical industries.

A workshop [Association for Promoting Sustainable Use of Medicinal Resources, APSUMR] has been set up with Ritsumeikan University in an attempt to promote exchange between China and Japan in the fields of plantation and botanical plants, and pharmaceutical industry.

We hope our workshop could cooperate with CGCM to accomplish TCM modernization from industry perspectives.

**Thank you!**
